

PEACE OF MIND

Lightweight, strong structural steel
The ultimate house-framing system

TrueCore[®]
Made Only By BlueScope Steel

Before choosing anything else, take this simple test.

Is it long-life and trouble-free?

Steel frames are shrinkage free - no sticking door and window jambs or cracking cornices. Walls, ceilings and roofs stay straight and true - easy to align future extensions.

Does it have the flexibility for your design?

Steel's structural strength allows for excellent spanning ability - a natural for today's wide open living spaces. Whatever your design - steel-framing suits both concrete slab and sub-floor construction and it's ideal for those steep, hilly sites. Steel-framed homes are electrically safe - designed so that any electrical leakage is conducted safely straight to the ground.

Is it naturally termite, borer and dry-rot proof?

Steel is free from the toxic chemical treatments often used to protect other framing systems.

Does it burn?

Naturally non-combustible steel products are widely used in high fire risk applications.

Is it easy to build?

Wall panels and roof trusses are clearly labelled for on-site assembly. Electrical and plumbing services holes can be pre-punched. Compatible with your choice of interior floor, wall, ceiling and roof materials.

Is it sustainable?

Steel-framing is the right choice for the environment because it can be recycled and is ideal for energy efficient designs.

Is it backed by experts?

Steel-framing specialists supply fully-engineered and builder-friendly steel-frames throughout Australia. Increasing numbers of builders are building steel-framed homes. Steel-framing systems are also available in kit-form.

Is it affordable?

Innovative steel-frame technology means pricing is competitive with other quality framing systems.

Does it come with a warranty?

A 50 year warranty (conditions apply) accompanies TRUECORE® steel used in steel house-framing.

Is there really any other choice?

None that makes so much sense on so many different levels. Once you've experienced the ultimate framing system you'll understand what we mean by 'peace of mind'.
